To Whom It May Concern:

Granite America, LLC was our granite countertop subcontractor for the Gateway Grand Project in Ocean City, MD, 196-luxury ocean front condominiums. Granite America, LLC has demonstrated high standard professionalism during every stage of the Project.

Granite America, LLC has a very unique business model. They send the entire job to China, where they have an office doing quality controls. Bovis LendLease team together with the owners and architects went to China to inspect the fabricated tops before shipping. Granite America, LLC China operations were able to develop a delivery schedule in the beginning, and executed exactly by the plan. All members of the team were very pleased with their fabrication quality, the inventory plans, and the quality control system in place.

Granite America, LLC has demonstrated their efficiency during installation as well. They have met and exceeded our demanding installation schedule. On average they installed one floor of the materials in one day. Mr. Gene Chu, the Owner of the company was personally involved in job progress at all time (in role of the project manager). He has leaded his crew to finish this job successfully.

Overall my staff and I are very pleased with the job they did, and I have no hesitation to refer them to any jobs that granite countertops are required.

Sincerely,
